

The Ultimate Shop for Racers

Atomic Pro Centers

Atomic Pro Centers are our competence centers created exclusively for FIS members and race enthusiasts, from junior racers to World Cup competitors. You'll quickly discover it's not just the gear that makes these places special. Our experienced alpine race technicians will work with you to find the perfect ski set-up. Our main Atomic Pro Center is located at the Atomic global headquarters in Altenmarkt, on the same site as our ski production and R&D facilities. Besides, there is also an Atomic Pro Center at SNO in Oslo and over 30 Atomic Pro Center Partners worldwide.

Racing Services

Experts with World Cup experience will share our top-end racing equipment with you and build your own individual set-up. It enables racers on the way up to experience the unique service enjoyed by our top Atomic stars—from having their skis tuned in our Race Department with Wintersteiger equipment to having their boots professional fitted by our Atomic race technicians.

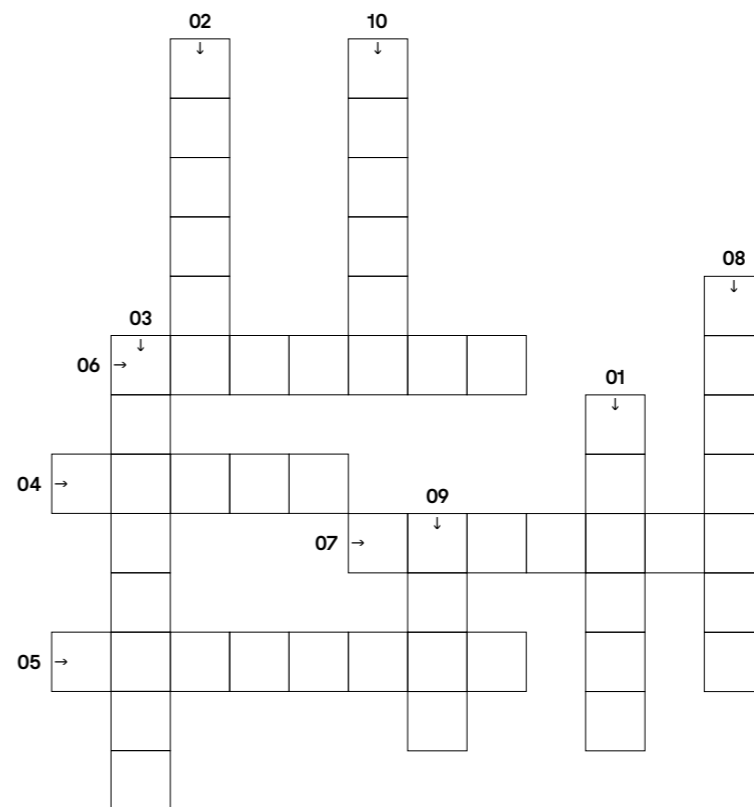

Appointment

Racing services are available in Altenmarkt and Oslo, and any of our Pro Center partners in your region. To make sure we have enough time for individual service, please book an appointment in advance. Please find our Atomic Pro Center and Pro Center Partners listed on the back page of the catalog.

How Well Do You Know Our Athletes?

Insert Their Last Names.

- 01 → Lost the crystal globe during the party.
- 02 → Is the latest newcomer in the Redster team.
- 03 → Made his/her first experiences on skis in the driveway of his/her parent's house.
- 04 → Met Mikaela Shiffrin for the first time in Chile.
- 05 → Was officially part of the Atomic product development team last season.
- 06 → Did the rehab program together with football star David Alaba.

- 07 → Has been skiing without an ACL in the right knee for two years.
- 08 → Periodically shares delicious recipes on the Instagram channel.
- 09 → Fought the home sickness in New Zealand with homemade Kaiserschmarrn.
- 10 → Won a race despite a broken hand.

Answers:
01 Feller, 02 Ljutic, 03 Shiffrin, 04 Kilde, 05 Braathen, 06 Schwarz, 07 Hahnen, 08 Puchner, 09 Ager, 10 Goggia.

Once a Junior, Forever a Champion

Supporting young, up-and-coming athletes with high-quality equipment, as well as tuning and boot fitting, has always been a top priority for Atomic. With our exclusive coaching program “Juniors To Champions”, we aim to take junior development to the next level. More than 60 years of experience in racing, combined with our close relationship with world-class athletes, means we know what it takes to become a professional skier: physical conditioning, mental strength, regeneration, nutrition, the perfect skis, boots, and goggles – not to forget the skills to tune those perfectly to any snow conditions. With Juniors To Champions – or JTC – we support our aspiring young athletes from U12 to U18 in all these aspects of ski racing by providing access to our network of World Cup-tested experts. And prepare them for the rigorous demands of professional sports.

Sounds promising, right?

So, how do we do it? Well, our target group is the pink of digital natives, so what better way to reach them than through their electronic devices? Broadcast direct from the local Atomic offices, we host frequent online calls for all our juniors, dealing with current topics around mental strength, physical training, sports nutrition and obviously product tuning. What began with boys and girls sitting individually in front of their devices quickly turned into JTC watch parties where everyone gets together in front of one phone or laptop. Eventually, this is what we wanted to create: a sense of community among junior racers.

Getting the JTC spirit on snow

While expanding knowledge at such a young age is great, racers want to race – and a coaching program wouldn’t be complete without training sessions on the white, cold gold we all love. But we want JTC to be unique and different and ordinary “Let’s all get better” camps won’t cut it. Instead, we want our juniors to truly get used to skiing at speed, all while testing new skis and lengths, and make new friends across borders and age groups. Moreover, the best ones have the honor of skiing the full season with their exclusive feature: a personalized bib in the JTC design and represent our program on the slopes. The big advantage of getting these proteges on snow is that we can involve them in prototype tests and get feedback straight away. This enables us to react quickly and effectively. The Icon binding is just one of many chapters of this story. Through all these initiatives, we bring our juniors one step closer to success, both on and off the race course. And from time to time, we’ll reward outstanding performances with exclusive access to World Cup races, including hallowed access to the treasury of success – the wax cabins of our service crew.

The Red(star) line in a skier’s career

With JTC, we want to make Redster a name that racers can rely on from U12 right up to World Cup level. Over the course of a career, coaches and teams may change. But once you’ve skied on a Redster, we do our best to make sure that it’s with you all the way. Last but not least, JTC also adds a whole new dynamic to our Atomic Pro Centers and Pro Center Partners, which have been serving as competence centers for equipment and racing service for many years. All in all, this makes Atomic’s commitment to junior racing pretty darned unique.

Construction →

Revoshock

When you're skiing at your limit, a smooth and precise ride makes all the difference. That's why we created Revoshock—a built-in suspension system for your skis—to block distracting bumps before they reach your feet. Made using an integrated grid of impact-absorbing stainless steel inserts embedded in an additional soft component, the new generation of Revoshock dampens even the deepest ruts and grooves to cushion up your line.

Carbon Boost

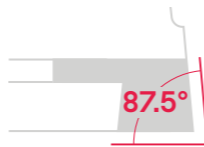

For your fastest days you need additional power, so we developed the Carbon Boost—a carbon insert that sits beneath your heel—to stiffen up your ski exactly where you need it. Providing a rebound of power to enhance your acceleration, Carbon Boost supercharges your turn exit from the gate to the piste.

Edge Angles →

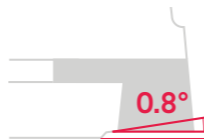

Side Edge Angle

Precisely tuned edges are an important part of ski performance. A dull edge cannot penetrate the snow surface and will skid through a turn. An edge that is too sharp will grab and catch the snow surface creating unstable performance. Our skis are prepared with a side edge angle of 87.0° for more intuitive handling, easier skiing and better grip on hard snow and ice.

Base Edge Angle

All skis from our factory are delivered with steel edges that have been carefully machined with a precise base edge bevel for specific performance characteristics. For our FIS skis we're using base edge angles from 0.5° (SL) to 0.8° (GS and JR) and 1.0° (SG and DH). They lightly lift the ski edges off the snow for easy turning while maintaining excellent edge grip and aggressive tracking throughout the turn.

Sidewalls →

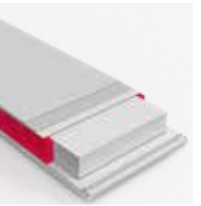

Dura Cap Sidewall

Sidewall from base to top sheet, for controlled power transmission and great edge grip. The rounded shape of the Dura Cap is a fantastic durability feature as it picks up fewer dents and dings.

Full Sidewall

Full sidewall runs across the full length of the ski for precise steering.

Core →

Ultra Power Woodcore

Made from strong ash—for supreme running stability and agility in our racing skis.

Power Woodcore

A sporty, dynamic ash and poplar woodcore that adds a ton of stability and dampens vibrations at speed.

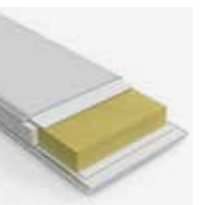

Light Woodcore

Made from Poplar wood, this core optimizes the ski's weight without sacrificing any shock absorption or stability.

Densolite Core

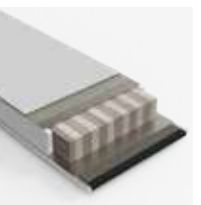

A foam core that's agile and dampens vibrations—for effortless skiing.

Laminate →

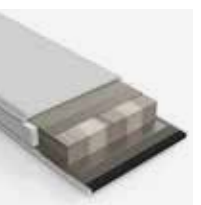

Ultra TI Powered

Our World Cup, athlete-proven technology Ultra Titanium Powered with updated double bonding is a Titanal laminate that runs from sidewall to sidewall adding stability, torsional rigidity and edge grip.

TI Powered

A Titanal layer above and below the core creates supreme shock absorption, strong running stability and high torsional flex.

Icon Family

Icon WC30/24

The Icon loved and trusted by our World Cup athletes. A podium winner in all disciplines, its centralized power transmission delivers the highest levels of performance, agility and responsiveness.

Icon RS16/12

The Icon for athletes on their way to the World Cup! As well as masters and other strong racers. It has the same centralized power transmission as its big brother – Icon WC – tailor-made for racing through the age groups.

Icon 12/10

The Icon for youngsters starting to get serious! It delivers the perfect weight and performance levels for children and juniors competing mainly in SL & GS – helping them stay in total control of their skis.

Centralized Power Transfer →

A wider base plate and race mounting pattern strategically position the binding screws directly under the boot to centralize and optimize power transmission. Delivering immediate power underfoot while allowing for more reactivity and response throughout the entire length of the ski, Centralized Power Transfer enables the racer to be in better control of the ski throughout the turn – in every discipline and type of course setting.

Metal Race Pedal →

Designed to deliver the best power transfer from boot to binding, Metal Race Pedal allows the boot to sit directly on the AFD for more direct energy transmission.

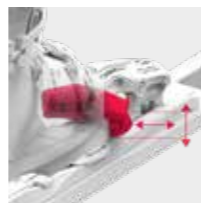

Elevated Brakes →

Our Elevated Brakes get up and out of the way, tucked in closer to the heelpiece of your binding, letting you ski more aggressive edge angles with less risk of catching the snow.

Automatic Toe Adaption →

The toe adapts automatically to your alpine normed boot height and width and ensures constant release values, even on worn out boots.

Redster Team

Redster STR

A high-energy boot in a slim 91 mm last, built for racers with narrow feet and a slighter build.

Redster TR

Exceptional performance and power in a World Cup boot with 93 mm last, designed with top athlete input.

Redster TX

An on-piste, race inspired boot with 96 mm last and a relaxed fit for all-day comfort and adaptability.

Redster TJ

Built with a 98 mm last for junior racers, this boot suits young, performance-oriented athletes.

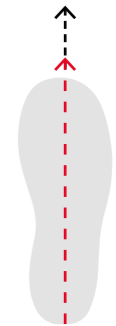

The Redster Thread

Consistent liner constructions across all three fits.

Same forward lean and ramp angle across all three fits.

Same stance in all three fits.

Ski selection of FIS products, both length and model, will be always very individual and a subjective decision. We noticed some common trends and following chart should help you to make the right decisions. The optimal skis FIS model and length is determined by the ability, the weight and also the strength of the user.

Discipline	Ski Length (min) Ski Length Measurement Tolerance of +/- 1 cm (cm)	Radius (min) (m)	Profile Width Under Binding (mm)	Profile Width in Front of Binding (mm)	Stand Height (max) Ski/Plate/Binding (mm)
WC/EC/COC/FIS Men + Women					
DH Men	218**	50***	≤ 65	≤ 95	50
DH Women	210**	50***	≤ 65	≤ 95	50
SG Men	210**	45	≤ 65	≤ 95	50
SG Women	205**	40	≤ 65	≤ 95	50
GS Men	193**	30	≤ 65	≤ 103	50
GS Women	188**	30	≤ 65	≤ 103	50
SL Men	165*	■	≥ 63	■	50
SL Women	155	■	≥ 63	■	50
<small>** -10 cm tolerance for Men U18 (Junior I) ** - 5 cm tolerance for FIS and ENL *** Radius measurement for DH skis with a preparation tolerance of -1m</small>					
U14 (K1)+U16 (K2)					
SG U14 Men/Women	■	■	≤ 65 mm	■	50 mm
SG U16 Men/Women	≥ 183 cm	30m	≤ 65 mm	■	50 mm
GS U14 Men/Women	≤ 188 cm	17m	≤ 65 mm	■	50 mm
GS U16 Men/Women	≤ 188 cm	17m	≤ 65 mm	■	50 mm
SL U14 Men/Women	≥ 130 cm	■	■	■	50 mm
SL U16 Men/Women	≥ 130 cm	■	■	■	50 mm
<small>≥ Minimum ≤ Maximum</small>					
Masters					
SG Men <small>GS skis are allowed!</small>	185 cm*	■	■	■	50 mm
SG Women <small>GS skis are allowed!</small>	180 cm*	■	■	■	50 mm
GS Men	185 cm**	■	■	■	50 mm
GS Women	180 cm**	■	■	■	50 mm
SL Men	■	■	■	■	50 mm
SL	■	■	■	■	50 mm
<small>* no tolerance/** - 5 cm tolerance For masters athletes the ski length is a recommendation (except SG)! No restrictions regarding length, width and radius for Women above 55 and Men above 65! The FIS recommendations and rules for ski length, radius and profile width can be found in the current FIS Specifications for Competition Equipment! www.fis-ski.com</small>
